2sms IBM WebSphere Solution Overview

The 2sms IBM WebSphere solution is one of 25 software solutions that act as a bridge from your corporate systems to the SMS messaging network. Visit www.2sms.com/software.aspx for more information.

The 2sms IBM WebSphere solution provides customers with an SMS Portlet which allows customers to make use of IBM WebSphere infrastructure to make text messaging available to everyone within an organization in a consistent and easy to use manner.

The 2sms Send Message portlet allows you to send text messages to one or many recipients who have been configured in an address book from your company directory.

The Portlet can be connected to a LDAP directory, and uses the WebSphere security vault.
