2sms SOAP Solution Overview

The 2sms SOAP solution is one of 25 software solutions that act as a bridge from your corporate systems to the SMS messaging network. Visit www.2sms.com/software for more information.

SOAP, short for **Simple Object Access Protocol**, is a lightweight XML-based messaging protocol used to encode information in Web service request and response messages before sending them over a network. SOAP messages are independent of any operating system or protocol and may be transported using a variety of Internet protocols, including SMTP, MIME, and HTTP.
