- Emergency situation response required

Internal Communications

- Shift changes
- Meeting reminders

Case Study

A Public Safety organisation needed a service which could help them to inform their people about emergency situations in a quick and reliable way. They knew that their employees were available on their cell phones and so were able to get hold of them when emergencies arose.

The staff rota was diverse every week therefore it was essential to use a service that integrated with their needs. 2sms provided them with Excel add in solution which helped them to send messages using their existing data which was modified easily on the spreadsheet depending on the needs.
